

Venezia Touch Cleaning Manual

It is recommended that the brewer and milk systems are cleaned daily to obtain high quality and healthy drinks.

Daily clean of the brewer and mixer system

You need for this cleaning :

- Small brush and brush set
- Jugs that can withstand hot water
- Cleaning tablets (Yellow tabs)
- Cleaning cloth

1

Open the door, empty the dreg bin and put it back. Turn off the machine and remove the top cover for better access.

Pull the coffee scraper arm aside. Clean the area with the brush, wipe off the underside of the stamp with a dry cloth. Clean the outside of the machine, dip tray and the bean hopper for coffee oils with a damp cloth.

2

3

Remove the two lids on the mixer houses, disassemble the houses by turning slight clockwise while pushing in. Clean the houses, lids and outlet nozzles (use small brush set) with warm soap water and dry. Assemble the clean mixer houses, lids and nozzles to the outlet again.

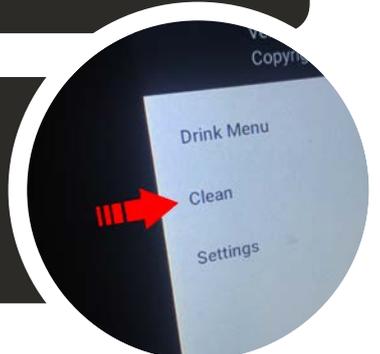

Close the door, turn the machine back on. Place an empty jug under the outlet. Open the door again and place a cleaning tablet (Yellow) inside the scraper arm. Close the door.

4

5

Start the automatic cleaning from the menu on the screen. Brew a coffee drink to test the machine and throw it away.

Venezia Touch Cleaning Manual

It is recommended that the brewer and milk systems are cleaned daily to obtain high quality and healthy drinks.

Daily clean of fresh milk system

You need for this cleaning :

- Jugs that can withstand hot water
- Cleaning liquids (blue & green)
- Cleaning cloth

Use the blue alkaline milk fat remover 4 times as often as the green descaler.

1

Place an empty jug under the outlet. Wipe of and place the milk hose/spear from the fridge in a jug with cold water. Choose the “Warm milk” drink from the menu to rinse the milk hose until clear water comes out.

Add 30 ml of cleaning liquid to an empty jug. Fill with 600 ml of hot tap water.

2

3

Place the milk hose/spear to the warm water with the cleaning liquid. Select “Warm milk” and run the cleaning liquid through the system.

Change back to a jug with cold clean water and run a few “Warm milk” drinks with clean water through the system.

4

5

Put back the milk with hose/spear in the fridge, run a milk drink to prime and throw the drink away.
