

A sleek, modern coffee machine with a curved black spout is dispensing coffee into a clear glass cup. The coffee has a thick, white head of foam. The machine is set on a white countertop. In the background, a dark coffee tray with several compartments is visible. The overall scene is lit with dramatic, low-key lighting, creating strong highlights and deep shadows.

Extraordinary drink solutions

scanomat

Coffee. Water. Juice.

Scanomat drink solutions combine a hyper-personalised, human-centric and meaningful experience with great taste and the latest in connected and touchless technology.

TopBrewer

TopJuicer

Minimum Footprint. Maximum Reassurance.

Personalised fresh-brewed coffee

Freshly roasted coffee from Amokka®

Touchless technology

Smart monitoring with CoffeeCloud

Built from 80% recycled steel

Fits uniquely into any space

Designed for remote smartphone use and to reduce shared contact points, TopBrewer provides a touch-free and reassuring premium coffee experience to meet the needs of today's coffee consumers.

Customise your personal coffee - order touchless

With the TopBrewer App for iOS and Android, you can easily make and customise your coffee.

You can even save your favourite drink in the app and order with voice control.

Next time you will get your coffee served as designed by you - on every TopBrewer you meet.

Case. Adobe

Location: London
Designer: Gensler
Installed: 2017
Machines: 7 TopBrewer Pro
Employees: 750-1000

Adobe wanted a space that would encourage spontaneous collaboration and social interaction. They installed 7 TopBrewer coffee machines throughout their neighbourhoods as an enabler of chance conversations and to provide a barista-quality coffee experience for staff and guests.

“ We chose the TopBrewer as it is designed with collaboration in mind and fits well with the ethos of the ‘third space’.

▪ Adobe’s Site Operations Manager

Quality with ease

The TopBrewer instantly brews a delicious espresso or coffee without sacrificing quality. Thanks to the advanced stainless steel grinder and the brewing mechanism, the time-out between brewing operations is second to none.

TopBrewer is the world's most sustainably designed commercial coffee machine. Built to be durable and long-lasting using recyclable materials. Energy-saving and better for the environment.

The iconic TopBrewer swan-neck tap is flushed through with fresh water after each drink, cleaning any residue from the milk and coffee lines, shortening the daily cleaning routine, and minimising the use of chemicals.

Maximum Choice

Choose between different coffee specialities, all brewed with freshly roasted coffee beans, and create your favourite drink. Refresh yourself with still or sparkling water. Warm up with steaming water for a cup of tea or hot milk. The possibilities are infinite.

Freedom to design

The TopBrewer will fit uniquely into any space. It can easily stand alone or integrate into installed furniture, even part of an existing environment. With our under-counter design and minimum space usage, we pride ourselves in making a coffee unit that unobtrusively fits into any beautifully designed environment.

We want to help and prepare you as a professional in the best way possible. With our product selector and pre-installation guides, you can easily prepare any space for the TopBrewer. Our guides include cutout, electrical, plumbing and ventilation requirements.

To use our resources visit the professionals section on scanomat.com.

“ When guests use TopBrewer for the first time, words such as ‘Wow’ and ‘How nice!’ quickly show how pleased they are.

▪ Lilou Linnet - COO, Office Club

Case. Office Club

Location: Copenhagen with
3 Office Hubs
Installed: 2019
Machines: 9 TopBrewers
Offers: Coffee/Sparkling

From the beginning, Office Club wanted to create a unique and exclusive office space and services for their clients. For Office Club, providing quality coffee on their premises as part of the experience they aimed to offer. During their research, the team discovered TopBrewer and found that it complimented the environment that they were creating. And the fact that the offices are located close to many cafes, they did not want clients leaving the premises to find their perfect latte.

Self-service with payment

A contactless self-service coffee machine with integrated payment is the way forward.

For TopBrewer, we have enabled contactless payment through ScanomatPAY with the ability to pay via credit/debit card or smart devices through ApplePay and GooglePay.

Providing a first-class premium, speciality beverage experience that is entirely self-service and economically viable has never been more straightforward with payments processed securely online.

Optimise your business with real-time data

CoffeeCloud is the world's most advanced cloud management system for coffee machines – with state-of-the-art real-time data for your organisation.

Available as an app for all platforms, CoffeeCloud gives you access to key data metrics and diagnostics at a glimpse on the dashboard, allowing you to work smarter and faster throughout the organisation.

Simple tasks like refilling the machine are sent directly to the responsible person's smart device. Receive diagnostic reports and address error reporting from within the CoffeeCloud. It will change how you run your business – and the entire landscape of coffee machine operation.

Amokka® Coffee roasted for TopBrewer

At Amokka® Nordic Roasters, we work with the utmost respect and responsibility for coffee beans and the environment.

We source our coffee beans directly from carefully chosen partner farms worldwide through our Impact Trade initiative. We partner with our farms to improve coffee quality and pay above market value to support the farmers with specific projects for agricultural equipment, earthquake relief, and school resources.

With Amokka®, you have total transparency about your coffee's journey - from bean to cup.

Ethically sourced and handpicked coffee by Amokka®

Premium coffee roasted exclusively for TopBrewer

Trace your coffee with Amokka®

Amokka® Nordic Roasters is the first roastery globally with transparent, digital traceability from picker to cup.

All data with the origin of the coffee bean, crop, variety, processing method, when the roastery received the green coffee beans and how it's roasted is accessible on our website.

For every coffee batch we roast, data is stored in our system from the farmers to the packing of the coffee bag. To trace the coffee you add to the TopBrewer, scan the dynamic QR-code you'll find on the back of the coffee bag.

Coffees for all tastes

At Amokka® Nordic Roasters, we always aim to have a wide variety of coffees. To help you find your personal favourite or to try new tastes, we have created the coffee compass.

When you have found which of our coffees matches your preferences, please remember that coffee taste is not static. You can influence the taste with the way you brew the coffee - even on the TopBrewer, you can adjust the brewing to get the coffee brew you prefer.

Our coffee compass shows whether the coffee taste is intense or mild, fruity, or roasted.

Get healthy hydration with TopWater

Our water dispenser, TopBrewer, offers pure BRITA® filtered water on demand - with or without bubbles.

Furthermore, it is a high capacity water solution that empowers your community to refill and hydrate. Flexible, under-counter design to fit any space with stainless steel counter mounted buttons or upgrade to touchless control with sensor buttons or iPad.

With its flexible design and high capacity, TopWater offers every working environment a perfect water dispenser.

TopWater offers high flexibility with dispensing and a clean design.

TopJuicer

Order touchless from a distance with TopJuicer.

Still, sparkling, & juices

Healthy drinks available on-demand from a minimal, sleek juice dispenser. TopJuicer offers personalised juices and filtered waters with the iPad or touchless from our app.

Every drink can be made still or sparkling. Mix & match three juices from our range. Chilled still and sparkling water comes as standard.

All drinks are from natural extracts with no artificial ingredients. Low calories, low sugar - just great tasting drinks and a wellbeing boost for all.

The story of Scanomat

Back in 1981, CEO of Scanomat Kim Vibe-Petersen designed the world's first fully automatic cappuccino machine. Since then, Scanomat has been known for its innovative, high-quality solutions. Today, our flagship product - the revolutionary TopBrewer - is changing the coffee experience and taking us on a journey worldwide.

Scanomat has reimagined the traditional bean-to-cup coffee machine with its innovative under-counter design, stylish swan-neck tap and app-control technology. Designed to meet the needs of today's coffee enthusiasts, the TopBrewer integrates seamlessly into any environment to deliver a full range of premium drinks, with an incredible taste and quality, at the touch of the TopBrewer App.
